Data Scientist and Operations Analyst With a Master's background in predictive modeling and AI implementation. Expert in bridging the gap between complex data insights and executive decision-making. Proven track record of spearheading digital transformation by migrating manual workflows into robust, data-driven system. Highly skilled in optimizing business processes, analytics, and financial operations. Proficient in Python, Tableau, and ML-driven automation to drive strategic innovation and sustainable business growth.

Experience

OCT 2025 - Present • Full Time

PT Binatama Wirawredha Konsultan

Strategic Data & Operations Analyst

- Led the digital transformation of tender analysis by migrating manual records into a structured analytical framework, enabling the identification of winning patterns and high performing region for strategic bidding.
- Trusted by CEO/Board to facilitate high-level decision making through data-driven executive summaries. Managed end to end tax administration (CoreTax) and established business performance tracking to evaluate project profitability and long-term viability.
- Architected a centralized database and automated monitoring system from the ground up to track company legalities and project compliance, successfully eliminating manual tracking errors.
- Standardized cross-functional operations between Finance, Legal, and Project teams by implementing digital verification protocols, ensuring 100% compliance and minimizing data exposure

JUL 2023 - APR 2025 • Project Based

Universitas Negeri Malang

Research & Data Analyst

- Managed end to end data. processing for grant-funded projects, ensuring rigorous data integrity and strict compliance with funding regulations to facilitate informed decision-making.
- Executed advanced statistical analyses to uncover actionable trends, directly optimizing resource allocation and shaping the project's strategic roadmap.
- Partnered with multidisciplinary teams to design and standardize data collection methodologies, guaranteeing high-fidelity data quality across all research phases

FEB 2023 - JUN 2023 • Internship

PT Bisa Artificial Indonesia (Bisa. AI)

Data Science & Artificial Intelligence

- Engineered automated Decision Support Systems (DSS) and predictive monitoring tools utilizing Machine Learning and Deep Learning frameworks to drive operational excellence.
- Developed and deployed an interactive web-based dashboard with seamless database integration facilitating real-time visibility into project milestones and regulatory compliance tracking

Education

JAN 2024 - AUG 2025

Universitas Negeri Malang

Master's Science

- Funded research grant for research mental health, optimizing methodologies through Machine Learning
- GPA : 3,74 / 4,00

SEP 2020 - JAN 2024

Universitas Negeri Malang

Bachelor's Science

- Specialized in non-invasive mental health assessment using physics-based methods, sensor data analysis, and advanced experimental design
- GPA : 3,67 / 4,00

Skills

- Python
- Tableau
- Microsoft Office & Google Workspace
- Predictive Modelling & Machine Learning
- Time Series Analysis
- Data Visualization
- Statistical Data Anlysis
- Data Driven Strategy & Insight
- Executive Reporting
- Financial & Tax Administration
- SQL
- Data Pipeline & Database Management
- AI-driven Automation
